

Tamarind Gulf and Bay Condominium Association

Policy Statement regarding Charging of Electric Vehicles

Tamarind does not provide vehicle charging stations for member use. Electrical automobiles, trucks, and similar vehicles are not allowed to recharge their vehicle batteries at any association common area 110-volt receptacle. Violators of this policy will be notified to remove their vehicle immediately. Repeated violations may result in a fine and/or towing from the property at the owner's expense. Association members may install a recharging station in their assigned parking space with approval from the Architectural Committee at the owner's expense.

Tamarind allows for overnight charging of electric golf cart batteries only in the designated 'Visitor' parking space next to the Maintenance Building. Electric golf carts left unattended while charging for more than 24 hours will be removed from the charging area. Repeated violations may result in a fine and/or towing from the property at the owner's expense.

Electric golf carts are not allowed to be charged in any other common area 110-volt receptacle designated for other association amenities. Violators of this policy will be notified to remove their vehicle immediately. Repeated violations may result in a fine and/or towing from the property at the owner's expense.

Electric golf carts must be parked in the owner's parking space or other designated 'Visitor' space when not in use. All golf carts must have a valid vehicle registration and Tamarind parking permit.
